Mission

STOMET Ltd. will be a professional company operating in the metal sector, creating economic added value in separate internal units thanks to effective organization and management system.

All our activities are determined by the basic principles underpinning the **company's philosophy**:

Our customer in the most important

Our superior goal is the **timely provision of services** in line with the needs of our customer

The company's most important resource is its **employees**

Durable molds and tools

Design, manufacture, repair and refurbishment of injection molds for:

- rubber and metal-rubber elements of car suspensions,
- technical products for the automotive industry,
- body seals,
- household appliances and pharmacy,
- multipurpose goods.

Reliable machinery and equipment

We specialize in:

- designing and manufacturing of machines and devices for the rubber and plastics industry,
- designing and manufacturing of robotic, automatic and semi-automatic production stations,
- modernization and performance of comprehensive repairs of machines and devices,
- manufacturing of spare parts.

Precise metal parts

We offer production and delivery of precise metal parts with different geometries:

- steel and aluminium bushes manufactured from tubes,
- metal and aluminium parts manufactured from bars,
- other products for various applications

Effective relocations and services

We offer comprehensive services regarding:

- disassembly, movement and installation of machines and devices,
- inspections and repairs of machines and devices,
- inspections of lifting equipment,
- manufacturing auxiliary equipment for production stations.

Quality Management

Quality management system based on the requirements of IATF 16949 and PN-EN ISO 9001 standards covers the entire STOMET company and applies to the all types of activity depending on its scope
